TOGETHER

## THANK YOU JIM

## JIM CRANE

Mr. James R. Crane has resigned from the Board in line with best corporate governance practices in order to pursue a business venture in the US with whom Cargojet has a significantly expanding commercial relationship. The Board thanks Mr. Crane for his invaluable leadership and contribution to the Corporation.

As lead director, Mr. Paul Godfrey will act as interim independent chair of the Board.
"During his three years as Chair, Jim's leadership and advice has guided the Board and Cargojet to achieve tremendous growth and success while significantly strengthening its governance practices," said Dr. Ajay Virmani, President and Chief Executive Officer. "We sincerely thank Jim for his time, advise and contribution to Cargojet."

## ALAN GERSHENHORN

Mr. Alan Gershenhorn has been appointed to the board of directors.

Mr. Gershenhorn brings over 40 years of experience in U.S. and international enterprise logistics to the Board. During his 39-year tenure at United Parcel Service, Inc. ("UPS"), the world's largest package delivery company.

Mr. Gershenhorn served in several significant leadership positions, including most recently as Executive Vice President and Chief Commercial Officer through June 2018. At UPS, Mr. Gershenhorn directed strategy, mergers and acquisitions, marketing, sales, public affairs, communications, and key growth strategies globally across the organization.

Mr. Gershenhorn is currently a Principal of Horn Strategy Partners, LLC, which provides strategy and business development advisory services to technology and logistics businesses.

## CEO'S MESSAGE

The year 2021 continues to be filled with challenges and opportunities for Cargojet. We sincerely appreciate the dedication and effort of all Cargojet Team members during these unprecedented times.

I would like you to join me in welcoming Alan Gershenhorn to the Cargojet Board and Family. We are very excited to have Alan be part of Cargojet's continuing success story. Also, it is very important we recognize and thank Jim Crane, our Chairman, for his leadership, guidance and advice to Cargojet over the years. Jim's contributions and insights have been truly valuable to the organization.

The rapidly increasing vaccination rates, both here in Canada and globally, provide us with optimism that we will get back to normal very soon. Not only will this allow the restrictions in place to be relaxed, but it will lessen the anxiety that everyone had endured for the last eighteen months, allowing us to resume those important personal connections with our friends and families. We will continue to work diligently towards providing a safe work environment according to the latest public health guidance.

We are very fortunate to be providing essential services in a sector of the economy that has continued without disruption from the effects of the pandemic. The work-from-home/shop-from-home culture has caused a structural shift in the way consumers shop and e-Commerce growth has been accelerated by several years. Cargojet is directly benefiting from this growth with increased demand of overnight air cargo services on our Domestic network and for our ACMI dedicated aircraft services.

While global demand for air cargo services is rising rapidly, there has been a dramatic reduction in global air cargo capacity with virtually no international passenger flying. Prior to the pandemic, over $50 \%$ of the world's international air cargo travelled in the belly hold of wide-body passenger aircraft. With most of the world's major passenger carriers retiring significant portions of their wide-body fleets, this capacity is not returning any time soon, if ever.

It is for this reason that Cargojet recently announced the acquisition of five additional B767-200/300F aircraft and two B777-300ERF aircraft. We recognize the opportunity, and we want to be one of the first to secure conversion slots starting in 2021 to ensure the delivery of new capacity needed to meet this shifting demand. Servicing our customers and their continued needs and requirements have also been our number one priority. We will continue to ensure we exceed their expectations by providing a consistent first class service.

We are extremely excited about the addition of the B777-300ERF to our fleet. This aircraft will provide significant global expansion capabilities for our air cargo services, travelling further and carrying almost twice the payload of the B767. We are currently identifying specific routes and customers, and we will share these details with you as they are confirmed. In the meantime, we can provide all Cargojet Team Members with an overview of these aircraft on the following pages.

We look forward to the continued growth of Cargojet as we expand into another new chapter of our phenomenal growth story!

Once again, my sincerest gratitude and appreciation to each of you for your continued dedication, commitment and hard work, which is the foundation of this organization. Please enjoy the summer, be safe and be healthy.

Cargojet's state of the art fleet of B777-300ERSF freighters are capable of carrying a structural payload of up to $222,000 \mathrm{lbs}$ utilizing 33 main deck positions, and 14 lower deck positions with 600 cubic feet of bulk cargo hold area.

Cargojet's 777-300ERSF is the ultimate Big Twin Freighter. With twin-engine efficiency that burns $21 \%$ less fuel per tonne than the 747-400 freighters, and big-cargo capability that sees $25 \%$ more volume than the 777-200LRF but retains $90 \%$ commonalty with its smaller twin.

The 777-300ERSF is the only large aircraft that offers a significant level of operational commonality with the 777-200LRF. In addition, it can operate seamlessly alongside the 777-300ER. In both cases, the 777-300ERSF can be inducted with minimal additional investment and minimal operational burden.

## PAX TO CARGO <br> MODIFICATION

- Freighter lining
- Window plugs
- Passenger doors deactivation
(except first pair of doors)

## CARGO PAYLOAD MODIFICATIONS

- Increase MZFW to allow 220k lb payload
- $146.5^{\prime \prime} \times 120^{\prime \prime}$ main deck cargo door
- Reinforced fuselage and replaced floor structure

## MODIFIED CREW COMPARTMENT

- 4+2or 9 supernumeraries
- Double bunk crew rest
- Wet galley with chiller and lavatory

## CARGO SYSTEMS

- 9G rigid cargo barrier
- One-minute smoke detection
- Main deck temperature control
- Modified ECS ducting
- Perishable and live animal carriage
- Provision for non-powered and powered cargo loading system

## MULTIPLE CONFIGURATIONS FROM COMMERCIAL TO MILITARY

## DIMENSIONS

Cargojet's state of the art fleet of B767-300ER freighters are capable of carrying a structural payload of up to 127,000 lbs utilizing 24 upper deck positions, containerized and 15 lower deck containerized positions with a loose load bulk cargo hold compartment.

Cargojet is the only Canadian air cargo operator to introduce this newer generation, longer range, more fuel efficient and environmentally friendly aircraft to our fleet.

Various types of cargo can be carried on the main deck including odd size cargo as well as live animals and perishable products.

The B767-300ER is capable of 3,500 nautical miles at max payload which with the stage lengths on demand lanes is a complement to our domestic network and allows us to expand into select international markets.

Cargojet's state of the art B757-200ER freighter is capable of carrying a structural payload of up to $80,000 \mathrm{lbs}$ utilizing 15 upper deck positions and loose load lower hold cargo compartments.

Cargojet is the only Canadian air cargo operator to introduce this newer generation, longer range, more fuel efficient and environmentally friendly aircraft to our fleet.

The aircraft carries the standard $88 \times 125$ ULD which is common with the B727 providing flexibility and efficiency on the domestic network.

Various types of cargo can be carried on the main deck including live animals and perishable products.

The B757-200ER is capable of 3,900 nautical miles at max payload.

## AS THEY RETIRE.....WE WISH THEM THE VERY BEST

## John Kim

Chief Financial Officer, John Kim, will retire at the end of May 31, 2021.
We wish John the very best in his future endeavors and sincerely thank him for his many contributions during his tenure at Cargojet, John was instrumental in helping the Corporation navigate during its early years of growth and successfully delivered several projects.
"I am fortunate to have been part of such a talented team, and want to thank the Board and the investment community for their support all through my tenure. Although I am retiring from my active role, I am committed to ensuring a smooth transition and will remain fully engaged on capital markets and investor relation areas during this process." said John Kim.

## Anju Virmani

Anju has been a member of the Cargojet family since its inception and was instrumental in developing and building our IT team and infrastructure to assist Cargojet in its growth and success.

We sincerely thank Anju for leading the growth and development of our IT strategies and platform and sincerely wish her the best of health and happiness in her well-earned and well-deserved retirement years.

We thank Anju very much for her dedication and commitment over past twenty years.

## Steve Cameron

Steve Cameron, our long standing Accounts Payable Supervisor decided to call it a day after 20+ years of service with the company. Steve is a hardworking, committed and friendly person. His punctuality is exemplary for the department. Even in the peak of pandemic, he made effort to be in the office every day and handled the workload. He dealt with hundreds of suppliers and processed thousands of payments with a smile on his face. We sincerely thank Steve for his commitment and pleasant attitude and his contribution to the company's success
We wish him all the best and hope he has a fun and fruitful retirement.

## JOIN US IN WELCOMING

## Milan Vyas

## Vice President, IT

Milan has extensive experience in the development and execution of technology strategy for several Business-to-Business organizations across multiple industries and business functions. He has provided hands-on leadership in roles of
 increasing accountability across all key areas of IT including Infrastructure \& Operations, Application Development and Support, End User Computing, Cybersecurity and IT Service Management.

He comes to us from Element Fleet Management where he was the VP of IT, Strategic Initiatives; there, he partnered closely with the business to grow the relationship with a new and very large strategic client and led all aspects of IT Delivery in service of that client. Milan also led IT planning and analysis to support the introduction of new business capabilities and decisions related to modernizing core legacy applications. Prior to that, Milan was a Director in the Technology Advisory Practice at PricewaterhouseCoopers (PwC) where he worked with clients on Digital Transformation initiatives and contributed to the development of PwC's Cloud Services Practice.

Milan has an MBA degree from Queen's University and a Bachelor's degree in Civil Engineering \& Computer Systems from McMaster University.

## Jenifer Ferguson

Director Crew Programs, Innovation and FRMS
Jenifer comes with rich experience of specializing in working with flight operations and crewing, she has held several management roles in various organizations. In this newly created role, Jenifer will work in conjunction with the Director SMS,
 Director Crewing and SVP Flight Operations. This role is designated by the CEO and Jenifer will report directly to myself.

We are confident that Jenifer will embrace the Cargojet culture and will take this new role to greater heights with the invaluable support to the entire Cargojet Family. Cargojet believes Safety in all our operations is a key element and Jenifer will bring about systems to enhance this function to our crews and flight operations.

## CONTINUING TO CONQUER COVID 19

As the situation with the coronavirus COVID-19 continues to unfold, we need to remain aware of the importance of playing our part to help avoid the spread of the virus. It is crucial that you self-monitor for symptoms constantly, being aware that the number of symptoms related to COVID-19 have increased from the initial set of symptoms that had been identified at the outbreak of the pandemic back in March 2020. If you feel sick or have any illness symptoms (such as fever, chills, cough, shortness of breath, sore throat, etc.) please stay at home and follow public health direction. If you develop any symptoms while you are at work, please notify your supervisor and leave the workplace. Team members have the company's full support through any required self-isolation or sick leave.

It is important that you continue taking the necessary steps to protect yourself and others, to include social distancing to the greatest extent possible, good hygiene practices, wearing masks at all times, following cleaning and disinfecting protocols, practicing proper coughing and sneezing etiquette, etc. We recognize that after more than one year of this situation the COVID fatigue is real, and we may have become tired of the "new normal" but now, more than ever perhaps, is a time to reaffirm those best practices that we have implemented, as positive COVID-19 numbers are still rising.

Cargojet has implemented guidelines and best practices in our workplaces to ensure the health and safety of our team, and to ensure our success and continuity of operations, but we need to ask that you please also make responsible decisions in your personal life.

It's easy to become overwhelmed by the state of the world on any given day, and the constant news contribute to a general sense of unease, so please don't hesitate to contact your manager/supervisor if you need help in any way or have any concern, as we appreciate that communication is very important during these unprecedented and challenging times.

Thank you so much for your efforts to help keep Cargojet safe for all our staff members and customers.
